Belgium-Luxemburg: How to face cyber security  
challenges together?

8 May 2019

A young man with light brown, wavy hair and tortoiseshell glasses is shown in profile, looking thoughtfully out of a window. His hand is resting under his chin. The background is a blurred view of a window with a view of greenery outside.

# Sounds familiar?

- Budget: limited
- Resources & skills: in short supply, hard to develop and maintain
- Decisions on solutions, TOMs, ...
- Incident response: a scramble
- Much effort goes to the basics

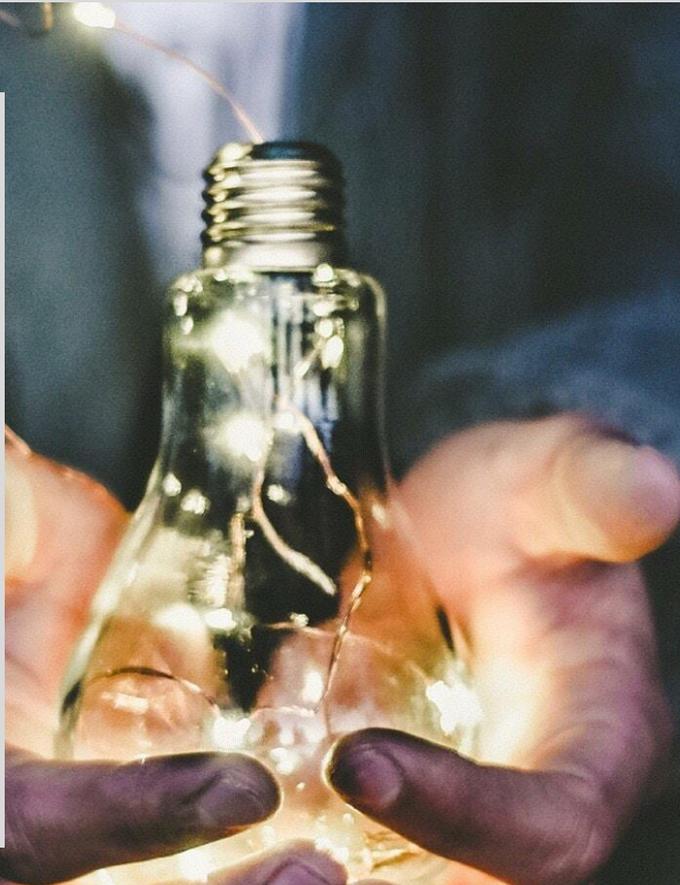

# Sharing Know-how is invaluable

- Tap into a 'virtual team'
- Experts connect with peers
- Reliable references
- TTPs and IoCs are shared by allies
- Sharing of 'common' assets

# What would be the value of...

- Sharing results of Red Teaming tests?
- Experts are motivated and develop their skills
- Practical advice on do's and don'ts
- Avoidance of a potential incident
- Re-use of std procedures

# Economic rationale of community action

A photograph of a man and a woman sitting at a wooden table, looking at a laptop. The man, on the right, is wearing a brown shirt and is pointing at the laptop screen. The woman, on the left, is wearing a light blue sweater and has her hands clasped. The background is a blurred office or meeting room.

- Shared capability building
- Information sharing & knowledge transfer
- Mutual aid
- Community self-governance

The Center for Cyber Security Belgium (CCB) is the **national centre for cybersecurity in Belgium.**

Their objective is to supervise, coordinate and monitor the implementation of the Belgian cybersecurity strategy. By optimizing the exchange of information, the population, companies, the authorities and the critical sectors will be able to protect themselves appropriately.

As a national authority, the CCB's tasks include informing and raising awareness among users of information and communication systems.

The Federal Cyber Emergency Team (CERT.be) is the **operational service of the Centre for Cyber Security Belgium (CCB)**, which supports the government, critical services and companies in the prevention, coordination and assistance in the event of cyber incidents.

# Experience Sharing

- 5 full day events
- Connect
- Build the trust network

# Operational Collaboration

peer-to-peer discussions  
in a trusted platform

- 9 focus groups
- Bringing together experts & peers across sectors
- Focused exchange

# Coalition Focus Groups

- Awareness
- Cloud Security
- Crypto
- CSIRT-SOC
- Enterprise Security Architecture (ESA)
- Governance, Risk & Compliance (GRC)
- Cyber Security Act
- Privacy
- Network & Information Security (NIS)

***Cooperation is key to protecting us  
against organized crime attacking our infrastructure & data***

# Policy Recommendations

- **Joint actions with CCB**  
(Centre for Cyber Security Belgium)
- **Responsible disclosure**
- **Investment pact on 'Digital Trust'**

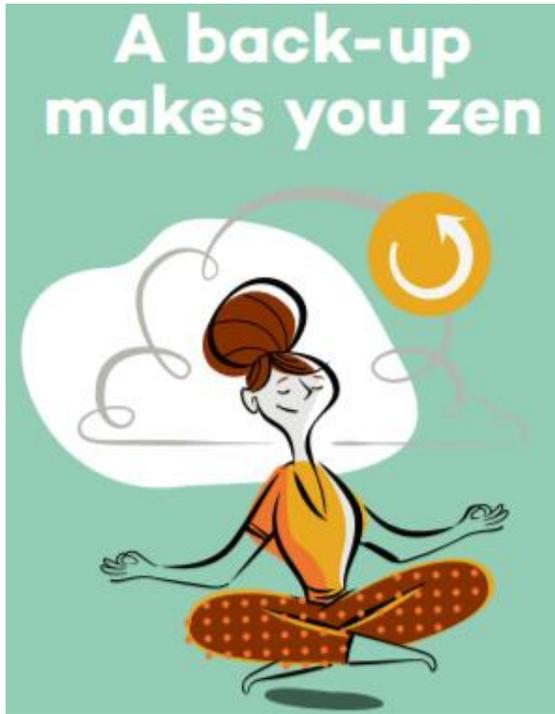

# Awareness Raising

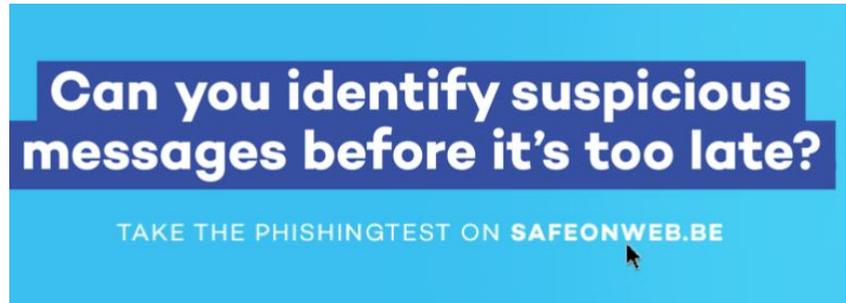

- Campaigns
- Free materials
- Guidelines for SMEs

**The impact of a joint awareness campaign is greater than an individual member's efforts**

# Yearly National Awareness Campaign

2018: Boost your digital health

2017:  
Phishing

2016: Safe internet behaviour

2015: Strong Passwords

# Ready-to-use materials

## Useful Tools

- SME Security Scan
- GDPR CheckUp

## Security KIT

- Social engineering
- Phishing
- Strong passwords
- Handling customer data
